

WHY CHOOSE I HAVE A VOICE?

We bring professional political lobbying to the classroom.

Our political literacy programme equips students with the tools and knowledge they need to put politics into action.

The programme is non-partisan and non-issue specific so that the toolkit we develop remains applicable as their politics and priorities change over their lifetime.

PUTTING POLITICS INTO ACTION

ENGAGE

students with politics by showing them how they can take action on the issues that matter most to them.

EMPOWER

students to speak up and have impact.

"I have a voice gives pupils something that the regular curriculum does not. Pupils have said it was the favourite part of their online learning this summer."

BRITISH VALUES

Students will gain an understanding of how citizens can influence decision-making through democratic processes; and we will provide them with the opportunity to develop and debate differing points of view.

CITIZENSHIP CURRICULUM KS 3 & 4

Students will gain an understanding of the political system at a local and national level. They will think critically about news sources, debate and substantiate their views on political questions and participate actively in the democratic systems of government.

A-LEVEL POLITICS

Students will understand how different pressure groups exert influence on government and Parliament including think tanks, lobbyists, corporations and media by actively lobbying using the same methods. The programme includes a careers talk from a lobbyist and we endeavour to arrange a talk with a local politician.
